### Test Report

| Test Name        |        | Results | Units | Bio. Ref. Interval |
|------------------|--------|---------|-------|--------------------|
| RAPESEED         | OTHERS |         |       | 3                  |
| SESAME SEED      | OTHERS |         |       | 4                  |
| SUNFLOWER SEED   | OTHERS | 56      |       |                    |
| TAPIOCA          | OTHERS |         |       | 6                  |
| TEA (black)      | OTHERS |         |       | 7                  |
| TEA (green)      | OTHERS |         |       | 8                  |
| YEAST (baker's)  | OTHERS |         |       | 9                  |
| YEAST (brewer's) | OTHERS |         |       | 8                  |

### Note

1. All results should be interpreted in relation to the individual case history.
2. Food intolerance is an IgG mediated reaction unlike food allergy which is IgE mediated.
3. This assay does not test any intolerance arising due to enzyme deficiency or chemical sensitivity.
4. Some individuals may show positivity for many food items, which could be due to local gut pathology. It is recommended to consult your physician

### Interpretation

| ELEVATED (>30 IU/mL)                                                           | BORDERLINE (24-30 IU/mL)                                                                                                     | NORMAL (<24IU/mL)                                                                              |
|--------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|
| Strong antibody reaction                                                       | Lower antibody reaction                                                                                                      | No significant antibody reaction                                                               |
| These primary problem foods should be eliminated/avoided for at least 3 months | These moderate to severe problem foods should be reduced and rotated for at least 3 months to avoid an increase intolerance. | These foods can be eaten without restriction provided there is no previous history of reaction |
| Choose alternative foods from NORMAL column.                                   | Choose alternative foods from NORMAL column.                                                                                 |                                                                                                |
